DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities:

On page 2, line 11 and page 4, line 30, change "rube" to --tube--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 9-13, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by **Brienza (4,961,588)**. **Brienza** discloses a rotary tubular kiln having a bowl-shaped heating tunnel interior (17) (SEE Figure 6), an externally heatable, rotatable tube (16) disposed within and generally surrounded by the heating wall and having an outer surface, a longitudinal sealing member (SEE Figure 3) within the interior of the heating tunnel extending from the wall to the outer surface of the rotatable tube providing an entry side and an exit side, the sealing member includes a rigid portion (24) and a flexible portion (10) positioned adjacent to the outer surface of the rotating tube and is positioned around the tube both above and below. The rigid portion is made of a refractory material (steel bar) and the flexible portion includes a plurality of

strips of resilient material (SEE Claim 2 & Figures 5 & 6) (this is also understood to encompass ceramic fibers) stacked together and extending perpendicularly to the axis of the rotatable tube (Figure 6).

Allowable Subject Matter

Claims 8, 14, 15, and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
